## **DETAILED ACTION**

### ***Response to Arguments***

Applicant's arguments with respect to claim 1 have been considered but are moot in view of the new ground(s) of rejection.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Kagan et al. (2004/0185600).

Re claim 1, Kagan et al. disclose a substrate (559) having a planar surface; first and second electrodes (552/553) located on said planar surface, said first electrode (552) having a top surface and a lateral surface, said lateral surface having an edge near said substrate; an electrode insulating layer (551) located on said top surface; a self-assembled layer (500) located on said lateral surface; and wherein said second electrode (553) is in contact with both said self-assembled layer and said electrode insulating layer (See fig. 5).

Re claim 2, Kagan et al. disclose wherein said self-assembled layer comprises a stack of at least two self-assembled layers.

Re claim 3, Kagan et al. disclose wherein said stack of self-assembled layers comprises an end group of a first organic molecule in a first self-assembled layer chemically coupled to an end group of a second organic molecule in a second self-assembled layer (Page 4, paragraphs [0066], [0067] and [0073]).

Re claim 5, Kagan et al. disclose wherein said self-assembled layer comprises non-conductive organic molecules.

Re claim 9, Kagan et al. disclose wherein a footprint of said electrode insulating layer is substantially aligned with said top surface.

### ***Allowable Subject Matter***

Claims 4 and 6-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
